

# ***CEMS: GETTING STARTED, MAKING IT WORK*** **Implementation Manual**

The new **CEMS: Getting Started, Making It Work** implementation manual is the newest user-friendly tool developed by AWO and the Coast Guard to provide CEMS implementation assistance. The manual is a practical, plain-language guide to making CEMS part of a company's operations. It includes practical tips, testimonials and lessons learned, and was written by AWO members who are in the process of implementing CEMS. The manual incorporates input from AWO members in every sector who have not yet begun to implement CEMS and have questions about how to make CEMS work for them. The manual is intended to answer the kinds of questions AWO members have raised about how to make CEMS work throughout the industry, regardless of company size, type, or area of operation.
