Sabine Surveyors, Ltd. Earns Auditor Status in AWO Responsible Carrier Program

AWO qualifies Sabine Surveyors to perform RCP towing safety management audits

(Washington, DC) – Sabine Surveyors, Ltd., with a 48-year record of offering professional technical services to the marine and offshore industries, has been approved by the American Waterways Operators (AWO) to carry out audits as part of AWO’s Responsible Carrier Program (RCP). The RCP, a safety management system for tugboat, towboat and barge companies, requires AWO member companies to undergo periodic management and vessel audits conducted by an independent third party.

Towing vessel operators serving the inland waterways, coasts and harbors are looking closely at their fleets to determine the best way to meet the new U.S. Coast Guard Subchapter M regulations establishing vessel safety and inspection requirements. Vessel owners and operators can choose whether to opt for annual Coast Guard inspections or adopt a Towing Safety Management System (TSMS). AWO’s RCP has been accepted by the Coast Guard as an existing safety management system that meets Subchapter M requirements.

“Our seven office locations, ISO 9001 and 14001 certifications, established quality procedure and a large staff of NAMS-CMS certified surveyors position our company to support the towing industry on a regional as well as national level. We value this agreement with AWO, and in conjunction with our approval from the Coast Guard, are positioned to offer the industry the highest level of tailored Subchapter M services,” said **Robert Keister**, Sabine Surveyors’ Manager, Compliance and Special Projects. “We will work to prove ourselves as trusted partners to AWO, its members, and the U.S. Coast Guard.”

“We are pleased to add Sabine Surveyors to the pool of well-qualified, well-trained third-party auditors who can conduct RCP/TSMS audits,” said AWO President & CEO **Tom Allegretti**. “The facilitation of member compliance with Subchapter M, and the elevation of safety and environmental stewardship standards across the tugboat, towboat and barge industry, are among

AWO's highest priorities. The approval of Sabine Surveyors to conduct third-party RCP audits will help ensure achievement of these goals.”

Located in major U.S. port cities, Sabine Surveyors' team of experts is prepared to guide owners and operators to develop a compliance plan that meets and exceeds their individual needs.

AWO has a 73-year history as the national advocate for the tugboat, towboat, and barge industry and is a recognized leader in maritime safety and environmental stewardship. Aligning AWO's industry expertise and robust safety management system with the safety culture and experience of Sabine Surveyors will support AWO's membership in meeting the technical, operational and regulatory challenges associated with the Subchapter M requirements.

###

About AWO

The American Waterways Operators is the national trade association representing the tugboat, towboat and barge industry, which operates on the rivers, the Great Lakes, and along the coasts and in the harbors of the United States. Barge transportation serves the nation as the safest, most environmentally friendly and most economical mode of freight transportation.
